

March 2018

Dear parent

We are fast approaching the revision stage of your son's GCSE Mathematics course; a vital part of this process is the completion of practice paper questions. This helps identify areas of weakness and encourages the boys to ask questions to address any shortcomings. The practice of examination questions is absolutely key to them achieving a good grade in the summer, allowing them to become used to the structure and demands of a GCSE paper.

The department has created some practice paper booklets for the boys to use (they write answers in their exercise books) but more papers have since been released. We have placed all available papers on SharePoint for the boys to access but we are aware of the cost and time implications of them printing these papers out. In light of this, we have decided to print and copy them at school for the boys to purchase at a cost of £12 for the collection. The beauty of them having their own hard copies is that they can carry the papers around with them and write solutions / make notes on them.

If you would like your son to purchase the paper booklets, please complete the attached reply slip. You can pay online or via reception.

Yours sincerely

K Jobson

Head of Mathematics
