

### **13E Practical Workshop**

Dear Parents/Guardians,

I have arranged for your son/daughter to attend a whole day workshop session on **Monday 26th February** in order to work on their practical piece for their Design and Technology coursework project. This is in light of the mock exams being moved into the spring term, reducing the amount of lesson time available. The day will start at 8.40, and rather than attending normal lessons and tutor time, your son/daughter will arrive at G6 (the workshop) and be able to spend the entire day manufacturing their product. There will be no other classes in D&T that day, and myself, Mrs Fair and Mr Greening (D&T Technician) will be on hand to support your son/daughter for the entirety of that day.

This will be an excellent opportunity for your son/daughter to make effective progress with their practical work and relieve some of the deadline pressure that can occur at the start of the summer term. The session will end at 5.00pm, and students are welcome to continue working until that time, but obviously if they have buses to catch, then they can leave at the end of the normal school day. Students should still wear normal school uniform.

If you have any queries about this, then please do not hesitate to contact me.

Yours sincerely,

Mr C Bream

Head of Design and Technology
